

2017 NovusLED Street Light Installation

CASE STUDY

Project

NovusLED was asked to substitute existing sodium and mercury luminaires to LED street lights on 28th October Street and Megalou Alexandrou Square in Aspropirgos, Greece. The goal was to turn this poorly illuminated street and square into bright and safe environments for both drivers and pedestrians.

Solution

- LED: Bridgelux Vero® Series SE 18
- Fixture: NovusLED ISL-40
- Optic: LEDiL STELLA-DWC2
- Technical Support: Radel S.A.

Benefits

The LED street lights offer approximately 65% energy savings, and significantly better light quality using only approximately 40W of power.

Quotes

"The result is fabulous; excellent uniformity without glare!"
-Billy Papadopoulos, Radel S.A.

"Using Bridgelux LEDs, we were able to develop efficient luminaires that deliver excellent lighting quality."
-Ioannis Kampolis, NovusLED

Final Installation

Bridgelux Array, NovusLED Fixture & LEDiL Optic
